Summary / Statement

I am a math graduate student who is in interested in the Langlands program, which is a cornerstone for the modern study of number theory, and I am doing some research with Prof Yiannis Sakellaridis.

Education

Johns Hopkins University   Baltimore, United States
    PhD, Mathematics, 2020-now   Advisor: Yiannis Sakellaridis
Tsinghua University   Beijing, China
    BSc, Mathematics, 2016-2020   Advisor: Bin Xu

Seminars & Conferences attended

Periods, functoriality and L-functions   Jan 2022
    CIRM, Luminy, France
Automorphic project & research seminar   2020-2022
    Zoom online
IHES summer school on Langlands program   July 2022
    IHES, Paris, France
Real reductive groups/atlas   2021-2022
    Zoom online
Lie groups days-in honor of David Vogan   Sept 2022
    MIT, Boston
Introductory workshop: Algebraic cycles, L-values, and Euler systems   Jan 2023
    MSRI, Berkeley

Teaching Experience

Johns Hopkins University: Teaching assistant
    AS 212: Honors Linear Algebra
    AS 304: Elementary number theory
    AS 107: Calculus II
    AS 602: Algebra II
